Nationality: Jordanian | Location: Doha, Qatar | LinkedIn: [Linkedin Profile](#) | Portfolio: [Mohammad Hafez](#)

Professional Summary

Data Science and Artificial Intelligence graduate with hands-on experience in AI engineering, machine learning, automation, data pipelines, computer vision, technical pre-sales, and IT audit. Experienced in translating business requirements into practical technology solutions, developing Python-based systems, automating operational workflows, and presenting technical capabilities to clients and stakeholders. Seeking opportunities in AI/ML Engineering, Data Science, AI Automation, Python Backend Development, IT Audit / Technology Risk, or Technical Pre-Sales.

Professional Experience

IT Auditor Intern | Deloitte, Doha, Qatar

Oct 2026 - Present

- Support IT audit engagements by assessing IT general controls (ITGC), access management, and change management processes.
- Assist in documenting walkthroughs, testing procedures, and audit workpapers in line with engagement methodology.
- Help identify control gaps and IT risks, and contribute to findings and recommendations for client management.

Technical Pre-Sales Engineer | Skyetron, Doha, Qatar

Aug 2026 - Oct 2026

- Assessed client requirements and translated business needs into practical AI, IT, cybersecurity, and enterprise technology solutions.
- Supported solution discovery, technical discussions, and solution presentations, coordinating between clients and technical teams.
- Drove lead generation and business development activities, identifying prospects and supporting the sales pipeline from first contact to proposal.
- Managed vendor registration with prospective clients and partners, handling documentation and compliance requirements.
- Represented Skyetron as presenter at the Qatar Event Show, introducing the company's solutions and engaging prospective clients and partners.

AI and Automation Engineer Intern | Transmed, Amman, Jordan

Jul 2025 - Dec 2025

- Automated tracking of 500+ containers daily using Python and Selenium, extracting and standardizing ETA, vessel, and terminal data across shipping portals.
- Built a structured PostgreSQL data pipeline with Power BI integration for historical shipment tracking, reporting, and data export.
- Worked on business intelligence, workflow automation, data processing, and internal application development.

Selected Technical Projects

AutoML Web Platform | FastAPI, Scikit-learn, XGBoost, LightGBM, SQLAlchemy

- Built a full-stack platform automating dataset handling, model selection, training, and evaluation for classification and regression, reducing model selection and training time by 70%.

Fruit Vision - Autonomous Robotic Fruit Sorting System | ROS 2, MoveIt 2, Python, OpenCV

- Integrated a robotic manipulator with ROS 2 and MoveIt 2 for autonomous motion planning and developed a computer-vision pipeline achieving 92% fruit detection accuracy while reducing sorting cycle time by 45%.

Medical AI Literature Review - Developmental Dysplasia of the Hip (DDH)

- Reviewed and compared AI/ML approaches for medical diagnosis, identified methodological gaps, and contributed to a manuscript currently under journal publication as fourth author.

Big Data Processing - Web Analytics | Hadoop MapReduce, PageRank

- Processed 1,000+ web pages to analyze web traffic, calculate product conversion rates, and rank hyperlink importance using PageRank.

Education

B.Sc. in Data Science and Artificial Intelligence | The Hashemite University, Zarqa, Jordan

Oct 2021 - Jul 2025

Technical Skills

Machine Learning & AI

- Python, Scikit-learn, XGBoost, LightGBM, PyTorch, Keras, Machine Learning, Deep Learning

Generative AI & LLMs

- LangChain, Retrieval-Augmented Generation (RAG), Hugging Face, LLM Application Development, Prompt Engineering

Computer Vision & Data

- OpenCV, Pandas, NumPy, SciPy, Data Preprocessing, Exploratory Data Analysis, Data Visualization

Software & Data Engineering

- FastAPI, SQLAlchemy, SQLite, REST APIs, Flask, Gradio, Git, Ubuntu, Selenium, Power BI, PostgreSQL

Robotics & Scientific Computing

- ROS 2, MoveIt 2, Robotic Motion Planning, Computer Vision for Robotics

Pre-Sales, Business Development & Client Engagement

- Technical Requirement Analysis, Solution Presentation, Lead Generation, Business Development, Vendor Registration, Event & Stakeholder Presentation, Client Communication, Stakeholder Management, Solution Assessment

IT Audit & Governance

- IT General Controls (ITGC), IT Risk Assessment, Access Management, Change Management, Control Testing, Audit Documentation

Certifications

IBM Generative AI Engineering Professional Certificate | IBM / Coursera

2025 - Present | 7 of 16 courses completed

- Coursework includes Generative AI, Prompt Engineering, Python for AI Development, Flask, LLM Applications, RAG, LangChain, Hugging Face, and Data Analysis.

Languages

- Arabic - Native
- English - Professional Working Proficiency | Duolingo English Test (DET): 110 Overall
