Research Interests

Scientific Machine Learning | Generative AI | Machine Learning | Data-Driven Scientific Computing | Physics-Informed Machine Learning | Deep Learning | Computer Vision | LLM Applications

Research Objective

B.Sc. graduate in Data Science and Artificial Intelligence with hands-on experience in machine learning, deep learning, computer vision, generative AI, and data-driven automation. Research experience includes a medical AI literature review and an autonomous robotic vision project involving ROS 2 and MoveIt 2. Interested in developing research skills in scientific machine learning and generative AI, particularly for data-driven modeling of complex systems. Seeking an M.S. research opportunity where I can contribute to ongoing machine learning research while developing rigorous research experience.

Education

B.Sc. in Data Science and Artificial Intelligence | The Hashemite University, Zarqa, Jordan

Oct 2021 - Jul 2025

Research Experience

Medical AI Literature Review - Developmental Dysplasia of the Hip (DDH) | Independent Research, Faculty-Supervised
2025 - Present

- Conducting a structured literature review of AI/ML methods for DDH diagnosis, comparing methodologies, identifying research gaps, and developing skills in literature analysis and research synthesis.
- Manuscript currently under journal publication; contributing as fourth author.

Fruit Vision - Autonomous Robotic Fruit Sorting System | Academic Project, The Hashemite University

- Integrated a UR3 robotic manipulator with ROS 2 and MoveIt 2 for autonomous motion planning, and a Python/OpenCV computer-vision pipeline achieving 92% fruit detection accuracy, reducing sorting cycle time by 45%.

Big Data Processing - Web Analytics | Academic Project

- Processed 1,000+ web pages using Hadoop MapReduce to analyze web traffic, calculate product conversion rates, and rank hyperlink importance using PageRank.

AutoML Web Platform | FastAPI, Scikit-learn, XGBoost, LightGBM, SQLAlchemy

- Built a full-stack AutoML platform automating dataset handling, model selection, training, and evaluation for classification and regression, reducing model selection/training time by 70%.

Professional Experience

Technical Pre-Sales Engineer | Skyetron, Doha, Qatar

Aug 2026 - Present

- Evaluate technical requirements and translate business needs into practical technology solutions across AI/IT and enterprise environments.
- Communicate technical concepts and solution capabilities to clients and collaborate with technical teams during solution assessment.

AI and Automation Engineer Intern | Transmed, Amman, Jordan

Jul 2025 - Dec 2025

- Automated tracking of 500+ containers daily using Python and Selenium, extracting and standardizing ETA, vessel, and terminal data across shipping portals.
- Built a structured database pipeline with direct Power BI integration for historical shipment tracking and data export.

Technical Skills

Machine Learning & AI

- Python, Scikit-learn, XGBoost, LightGBM, PyTorch, Keras, Deep Learning, Machine Learning

Generative AI & LLMs

- LangChain, Retrieval-Augmented Generation (RAG), Hugging Face, LLM Application Development, Prompt Engineering

Computer Vision & Data

- OpenCV, Pandas, NumPy, SciPy, Data Preprocessing, Exploratory Data Analysis, Data Visualization

Scientific/Robotic Computing

- ROS 2, MoveIt 2, Robotic Motion Planning, Computer Vision for Robotics

Software & Data Engineering

- FastAPI, SQLAlchemy, SQLite, REST APIs, Flask, Gradio, Git, Ubuntu, Selenium, Power BI

Pre-Sales & Client Engagement

- Technical Requirement Analysis, Solution Presentation, Client Communication, Stakeholder Management, Solution Assessment

Methods

- Model Training & Evaluation, Classification, Regression, Data Analysis, Automation, Literature Review

Certifications

IBM Generative AI Engineering Professional Certificate | IBM / Coursera

2025 – present | 7 of 16 courses completed

- introduction to Artificial Intelligence (AI)
- Generative AI: Introduction and Applications
- Generative AI: Prompt Engineering Basics
- Python for Data Science, AI & Development
- Developing AI Applications with Python and Flask
- Building Generative AI-Powered Applications with Python (LLMs, RAG, LangChain, Hugging Face)
- Data Analysis with Python

Languages

Arabic - Native

English - Professional Working Proficiency | Duolingo English Test (DET): 110 Overall

- Speaking, Writing, Production: 120
- Literacy: 115
- Conversation: 110
- Comprehension, Reading: 105
- Listening: 100
